SURFACE ANALYSIS

The map displays a complex weather pattern over East Asia. Key features include:

- Pressure Systems:** A low-pressure center (L) is located over the Korean Peninsula, with a secondary low further east near the Philippines. High-pressure centers (H) are situated to the north and south of these lows.
- Weather Phenomena:** Extensive areas of fog [W] and low clouds [GW] are depicted across the Korean Peninsula and surrounding waters. Wind vectors indicate varying directions and speeds, with some areas showing speeds up to 30 knots.
- Geographical Context:** The map includes outlines of major landmasses such as the Korean Peninsula, Japan, and the Philippines, along with latitude and longitude grid lines.
