SURFACE ANALYSIS

The map displays a complex weather system over the Western Pacific, centered around the Philippines. Key features include:

- Pressure Systems:** A central low-pressure system (1006 hPa) with a semi-circular low (1010 hPa) to the east. Other systems include a low (1046 hPa) to the west and a low (1026 hPa) to the south.
- Wind Patterns:** Wind vectors and speeds are indicated throughout the map. A large area of high winds (30 to 55 kt) is shown to the east of the central low.
- Weather Conditions:** Various weather symbols are used to denote conditions such as rain, clouds, and fog. A large area of rain is shown over the Philippines and the surrounding waters.
- Geographical Features:** The map shows the outlines of the Philippines, Taiwan, and parts of the South China Sea.
