SURFACE ANALYSIS

The map displays a complex weather pattern over the Western Pacific. A prominent low-pressure system is located off the coast of Japan, marked with a circled 'L' and labeled "ALMOST STNR". To its east, another low-pressure area is identified as a "DEVELOPING LOW" with a forecast of winds increasing to 30-50 knots within 24 hours. High-pressure systems are shown as areas of closed contour lines, some labeled "H". Weather fronts, including cold fronts (CF) and warm fronts (WF), are depicted with standard meteorological symbols. Numerous station reports provide specific data points such as temperature, dew point, and wind speed. The map covers a vast area from approximately 10°N to 40°N latitude and 100°E to 160°W longitude.
