SURFACE ANALYSIS

The chart displays a complex weather pattern over the Western Pacific. Key features include:

- Pressure Systems:** A low-pressure system (L) is centered over the Philippines with a pressure of 994. Another low-pressure system is located further east with a pressure of 1002. High-pressure systems (H) are present at 1014 and 1024.
- Fronts:** A cold front (indicated by a line with triangles) extends from the low-pressure system over the Philippines towards the southeast. A warm front (indicated by a line with semicircles) is located further east.
- Weather Conditions:** Various weather symbols are used to indicate conditions such as fog (FOG [w]), rain (rain cloud symbol), and other atmospheric phenomena. Wind speeds and directions are also marked.
- Geographical Features:** The outlines of the Philippines and other landmasses in the region are shown.
