A graph showing the relationship between Latitude (Y-axis) and Nautical Miles (X-axis). The Y-axis is labeled 'LATITUDE' and ranges from EQ (Equator) to 60N. The X-axis is labeled 'NAUTICAL MILES' and ranges from 0 to 600. Five curves are plotted, representing latitudes of 10, 20, 30, 40, and 60 degrees North. The curves show that for a given distance in nautical miles, the latitude is higher for a longer duration of travel.
