New FORMATION EXPECTED

A line graph showing the relationship between Latitude (Y-axis) and Nautical Miles (X-axis). The Y-axis is labeled 'LATITUDE' and ranges from 'EQ' (Equator) to 60N, with major grid lines every 20 units (EQ, 20N, 40N, 60N). The X-axis is labeled 'NAUTICAL MILES' and ranges from 0 to 600, with major grid lines every 100 units. Six curves are plotted, representing distances of 100, 200, 300, 400, 500, and 600 nautical miles. The curves are concave down, starting from the X-axis and increasing in latitude as distance increases. The 100 NM curve reaches approximately 10N at 600 NM. The 600 NM curve reaches approximately 60N at 600 NM.
